All Summer Institute students are required to take Academic English, in addition to one elective course. From the list below, please indicate your first and second choices. Intent to Register does not constitute an official enrollment. Every effort will be made to place students in their first choice.

**EXAMPLE:** 1 Art 2 Biology

**FIRST NAME:** ____________________________ **FAMILY NAME:** ____________________________

**ART - ART4980**  
Course offered through the College of Arts and Sciences  
__Cultural Institute and Museum Study__  
This course introduces students to the field of Arts Administration and Cultural Institutions. Learn in the field and experience many of Atlanta's greatest attractions! These field trips to different cultural institutions will enable students to learn about professional and vocational opportunities within the context of museums all over Atlanta. Students will be introduced to a variety of learning, teaching, and administration theories for a museum career path. Students will have first hand experience visiting several types of cultural institutions, such as the World of Coca-Cola, Georgia Aquarium, Zoo Atlanta, the Paper Museum, the Center for Puppetry Arts, the Fox Theater, the High Museum of Art, Atlanta Botanical Garden, Stone Mountain, or Atlanta Historical Center. This course focuses on the combination of exploration of theory and hands on practice.

**BIOLOGY - BIO4905**  
Course offered through the College of Arts and Sciences  
__Theme-Based Biology Lab: Molecular Biotechniques from Genomics to Proteomics__  
This course features lectures on topics in Molecular Biology and Biotechniques. Students will get hands-on experience with innovative experiments in gene cloning and protein expression and will take tours of cutting edge biotech facilities for genomics and proteomics.

**COMPUTER SCIENCE - CSC2301**  
Course offered through the College of Arts and Sciences  
__Programming for Non-Majors__  
This class introduces students to computer programming. Beginning learners welcome. No prior programming experience is required. The class emphasizes cutting edge design principles (e.g., pseudocode, stepwise refinement, object-oriented design as well as understanding the syntax and semantics of an appropriate language). This class is for non-majors interested in obtaining some helpful and fundamental computer programming skills.

**EDUCATIONAL PSYCHOLOGY - EPY2040**  
Course offered through the College of Education and Human Development  
__The Science of Learning__  
Science of Learning explores how we learn and study best. This course also explores theories and research that support effective learning and study strategies. Students will practice effective learning strategies and apply the science of learning to help others learn best. Come join us in learning how to learn.

**INTERNATIONAL BUSINESS - BUSA3000**  
Course offered through the Robinson College of Business  
__Globalization and the World Economy__  
Interested in the future of the economy on an international scale? This course examines worldwide integration of economic, political, technological, cultural, and social facets to explore the impact of globalization on organizations and individuals worldwide. Students develop an in-depth understanding of the macro environment of the global marketplace. They learn how to apply their knowledge of global markets through the simultaneous consideration of all business functions. Methodologies of country market assessment are researched and explored while applying critical thinking through writing.

FIRST NAME: ___________________  FAMILY NAME: ___________________

LAW - LAW9000
Course offered through the College of Law

_____ Introduction to U.S. Law  This course introduces LL.M. students whose first law degree was awarded by a law school in a foreign country to the concepts of law fundamental to, and the legal institutions operating within, the United States legal system. The course will include an overview of the U.S. legal system including the function and procedures of civil and criminal courts. It also included a survey of substantive legal topics that form a core of knowledge essential to the practice of law in the United States. This course is required for LL.M. students with a foreign law degree.

NURSING AND HEALTH PROFESSIONS - SNHP3050
Course offered through the School of Nursing and Health Professions

_____ Communication and Cultural Diversity in Health Care System  Learn how to communicate effectively with people from all over the world! The purpose of this course is to increase awareness of diverse cultures in the framework of intercultural communication skills. Students will enhance their knowledge of culture and assess its impact on intercultural communication. Global topics related to culture and communication will be explored from a global perspective with a focus on cultural competency and service delivery to diverse groups. This course is appropriate for all health-related majors.

PHILOSOPHY - PHIL3730
Course offered through the College of Arts and Sciences

_____ Business Ethics  This course focuses on strengthening your ability to identify ethical aspects of business decisions, providing you the tools to evaluate contemporary issues and enduring problems in domestic and international business, and acquainting you with major moral theories and current management theories so that you can make ethical decision when they arise in your working life. Using actual business cases, the course will consider such issues as the moral responsibilities of employers to employees and of employees to employers, the ethics of bargaining, the use of deception in marketing, right to intellectual property, diversity in the business world, and the responsibilities of businesses to preserve the natural environment. Students will consider these issues in both domestic and international contexts.

PUBLIC SPEAKING - SPEECH1500
Course offered through the College of Arts and Sciences

_____ Public Speaking  Become the best public speaker you can be! Learn how to prepare and deliver speeches to inform and persuade every audience. Special emphasis is placed on the fundamentals of organization, structure, and content of speeches. The student will analyze and research some of the best American speeches, both historical and contemporary.

All Summer Institute students are required to take Academic English. Summer Institute students will be automatically enrolled in Academic English, so do not select it as one of your elective course choices.

ACADEMIC ENGLISH - AL2290
Course offered through the College of Arts and Sciences

Academic English  Academic English will help improve all aspects of your English skills! Designed to address all four English skills – reading, writing, speaking, and listening – this course prepares international students for academic English at an American university level. Students will be placed based on proficiency, with coursework and activities designed to meet the students at their individual proficiency level.

Please complete this form and return it to the Office of International Initiatives at oii@gsu.edu by February 1, 2016. Apply online at gsu.edu/summerinstitute.
